Hazmat (Security Awareness) Training for Radioactive Materials Shippers

– Post Test –

Name: _____ Date: _____

Facility: _____ Score: _____

Please note that this test is not complete until the document has been signed below.

1. Initial Hazmat training is required 90 days after employment (for a job that includes hazmat duties), and then every _____ years thereafter.
2. Is an exposure rate measurement required for each package? (**Circle – Yes or No**)
3. At what distance is the Transportation Index measured?
4. If the max exposure rate on the surface of a package measures 1.0 mrem/hr, what label category should be used?
 - a. White-I
 - b. Yellow-II
 - c. Yellow-III
 - d. White-II
5. Name 3 things that are required to be noted on the label of the package.
 -
 -
 -
6. Name 3 things that are required to be noted on the shipping papers.
 -
 -
 -
7. For Excepted Packages, are surveys required? (**Circle – Yes or No**)
8. For Excepted Packages, are shipping papers required? (**Circle – Yes or No**)
9. **True or False:** When returning an excepted package to the pharmacy, a wipe is not required for contamination.
10. When wiping a package, the removable contamination measured on a GM survey meter must be under _____ cpm.
 - a. 100
 - b. 5000
 - c. 6600
 - d. 1,254

I, _____, attest that I have watched/read the required DOT Hazmat training provided by Corwin Health Physics, and have answered the questions above based on this training.
